

Over the past 20 years, SSP has formulated and manufactured over 1,000 different silicone compounds for our customers. Some have incorporated slight variations to pigment that enabled a color match between multiple parts for a customer. Others required full development and testing to insure that the silicone performed precisely to the customer's specifications. We have worked closely with our clients to understand their manufacturing process. We use this information to tailor catalyst and cure mechanisms within the silicone to maximize efficiency, yield, and throughput.

Silicone Family or type	Specifications/description	Supplied As
General Purpose	-Shore A 10 to 90 -Any pigment -Any catalyst	-Uncured ready to mold (bulk, perform thickness on roll) -Uncured uncatalyzed -Cured sheets -Cured rolls
Premium Grade	High purity platinum cure silicones	-Uncured ready to mold (bulk, perform thickness on roll) -Uncured uncatalyzed -Cured sheets
Fluorosilicone	100 % Fluorosilicones for fuel and chemical resistance	-Uncured ready to mold (bulk, perform thickness on roll) -Uncured uncatalyzed -Cured sheets
Mil-Spec	-A-A-59588A (formerly ZZR)several types and classes -Mil-R-25988 several types and classes -AMS Spec several grades and compounds	-Uncured ready to mold (bulk, perform thickness on roll) -Uncured uncatalyzed -Cured sheets
Other	-FDA COMPLIANT -USP CLASS 6 -HIGH TEMP -LOW TEMP -FLAME RESISTANT	-Uncured ready to mold (bulk, perform thickness on roll) -Uncured uncatalyzed -Cured sheets

Because we cannot foresee or control varied conditions, under which this information and our materials may be used, we do not guarantee the applicability or accuracy of this information or the suitability of our materials for their specific purposes. This material is provided without warranty, either expressed or implied, of fitness for a specific purpose or nothing herein shall be construed as a recommendation for uses which infringe valid patents or as extending a license under valid patents.
